APPENDIX I - CONTENTS

	Page
Survey Technical Notes	A-1
Statistical Tables	
A. Tobacco Warehousing	
1. All Establishments: Number of establishments, nonsupervisory employees, and number and percent of aggregate and cumulative hours worked, workweeks ranked by hours worked in each week, 1967.	A-5
2. All Establishments: Distribution of establishments by number of weeks with nonsupervisory employees and number of peak weeks accounting for 50 and for 75 percent of the annual man-hours of the establishment, 1967.	A-6
3. All Establishments: Distribution of establishments by number of weeks with nonsupervisory employees and number of weeks establishments operated more than one shift, 1967.	A-6
4. Multiple Shift Establishments: Distribution of establishments and aggregate hours worked in these establishments by the proportion of aggregate hours accounted for by the first shift, selected workweeks, 1967.	A-7
5. Multiple Shift Establishments: Distribution of establishments and nonsupervisory employees in these establishments by the proportion of employees on the first shift, selected workweeks, 1967.	A-7
6. All Establishments: Number and percent of aggregate hours worked by nonsupervisory employees, by length of workweek, selected workweeks, 1967.	A-8
7. Establishments Classified by Number of Shifts in Operation in Selected Workweeks: Number of nonsupervisory employees and man-hours worked on first shift and percent distribution of aggregate hours worked by length of workweek, selected workweeks, 1967.	A-8

TECHNICAL NOTES:
WAGE-HOUR SURVEY OF PROCESSORS AND HANDLERS OF AGRICULTURAL COMMODITIES

Prepared by the Statistical Reporting Service
of the United States Department of Agriculture

General

The survey was designed to provide estimates of industry characteristics presented in the statistical tables of this Appendix. The selected agricultural processing and handling industries included in the survey were separated into two groups for survey purposes.

The estimates for the first group relate only to establishments with one or more nonsupervisory employees and the primary activity during the 1967 calendar year of: (1) receiving and auctioning or receiving and storing leaf tobacco; (2) stemming and redrying leaf tobacco; (3) receiving, storing and loading grain (excluding establishments with storage capacity of less than 50,000 bushels); (4) sugar beet processing; (5) ginning seed cotton; (6) cotton compressing or cotton storing; (7) cottonseed processing; or (8) processing or handling raw milk and cream (excluding establishments with more than 50 percent of the value of production or sales from ice cream and frozen desserts).

The estimates for three of the four industries included in the second group relate to establishments with one or more nonsupervisory employees and the primary activity during the 1968 calendar year of: (1) processing of fresh noncitrus fruits and vegetables; (2) processing of fresh citrus fruits; and (3) processing of sugar cane. Estimates for the fourth industry relate to establishments, with one or more nonsupervisory employees, that handled fresh fruits and vegetables received direct from growers or growing area assemblers, except establishments primarily engaged in retailing, processing of fresh fruits and vegetables or establishments that are primarily city wholesalers or jobbers engaged in distributing to retailers. The survey covered operations in all 50 States and also included tobacco and sugar cane operations in Puerto Rico.

Each industry list included all known establishments which could have engaged in the specific activity during the specified calendar year. The questionnaire was designed to screen out those operations which did not qualify during the reference year. The questionnaires used are reproduced as the final part of this Appendix.

Collection Method

The survey was conducted by the State Statistical Offices of the Statistical Reporting Service, U. S. Department of Agriculture. Questionnaires were mailed to potential respondents about July 1, 1968 for the first group and about April 1, 1969 for the second group. A follow-up mailing was made about 10 days later urging cooperation in the survey. A non-respondent follow-up enumeration sample was selected from all potential respondents who had not

returned a completed questionnaire by August 1, 1968 or April 29, 1969. Non-respondents in each group were interviewed during the month of August, 1968 and May, 1969, respectively.

Systematic random sampling methods were employed in sample selection for both the mail and follow-up interview phases of the survey. The sampling rates used for the various universe lists are shown in the following table:

INDUSTRY LIST	PERCENT OF UNIVERSE MAILED QUESTIONNAIRES	PERCENT OF NON-RESPONDENTS INTERVIEWED
Tobacco warehousing	100	50
Tobacco processors	100	50
Grain storage facilities (stratified by storage capacity)		
a. over 1 million bushels	100	100
b. 50,000 to 1 million bushels	25	25
Sugar beet processors	100	100
Cotton gins	33	33
Cotton compressors	100	100
Cotton storage	33	33
Cottonseed processors	100	50
Milk and cream processors and handlers	25	25
Noncitrus fruit and vegetable processors	100	25
Citrus processors	100	100
Sugar cane processors	100	100
Fruit and vegetable handlers	20	1/25

1/ Because of the special summaries for Florida and Texas, and for California and Arizona all non-respondents were interviewed in these States.

More than 12,500 potential respondents were mailed a questionnaire and 2700 non-respondents were interviewed. Reports for establishments which were not primarily engaged in the specified activity during the survey year or which had no nonsupervisory employees during the year were excluded from the industry summaries. The total number of reports summarized and used as the basis of the industry estimates was 3984.

Estimation Method

Industry estimates were obtained by applying an expansion factor to the summations of individual establishment reports. The expansion factor for each industry was the reciprocal of the sampling rate adjusted for refusals. The percentages and ratios shown in the tables are based on unrounded expansions. Therefore, calculations performed using the rounded data in the tables may not produce the same numeric result. Also, as noted on individual tables, details shown in the tables may not add to the totals because each entry was rounded independently.

Level of Summarization

The industries surveyed for operations during the 1967 calendar year were summarized only at the industry level. Industries engaged in fruit and vegetable processing or handling were summarized at the industry (United States) level and by geographic areas. The geographic area tabulations were prepared to determine what effect geographic location has on the industry operations being studied. The specific geographic areas and States included in each are as follows:

Northeast

Maine	Massachusetts	New York
New Hampshire	Rhode Island	New Jersey
Vermont	Connecticut	Pennsylvania

South

Delaware	Georgia	Arkansas
Maryland	Florida	Louisiana
Virginia	Kentucky	Oklahoma
West Virginia	Tennessee	Texas
North Carolina	Alabama	
South Carolina	Mississippi	

North Central

Ohio	Wisconsin	North Dakota
Indiana	Minnesota	South Dakota
Illinois	Iowa	Nebraska
Michigan	Missouri	Kansas

West

Montana	Arizona	Oregon
Idaho	Utah	California
Wyoming	Nevada	Hawaii
Colorado	Washington	Alaska
New Mexico		

In addition to the above, special summaries for selected items were prepared for: (1) Florida and Texas; and (2) California and Arizona. Only the tables for Florida and Texas, and for California and Arizona were presented for fresh citrus processing because they were the only States in the South and West regions, respectively, which processed fresh citrus fruits.

Sugar cane processing was summarized only by individual growing areas--Florida, Puerto Rico, Louisiana and Hawaii.

The summation of individual region estimates may not add to the United States estimate where rounded estimates are involved.

Limitations

Data in the accompanying tables apply to either the 1967 or 1968 calendar year. In evaluating the data, any unusual conditions which affected operations in a particular industry should be kept in mind.

For example, it should be noted that the 1967 cotton crop in the United States was the smallest in 50 years. Estimates of production for 1967 and other recent years are shown below.

UNITED STATES COTTON PRODUCTION

Year	Production (500-lb. gross wt. bales)
1962	14,867,000
1963	15,334,000
1964	15,182,000
1965	14,973,000
1966	9,575,000
1967	7,458,000
1968	10,948,000

TOBACCO WAREHOUSING

Wage-Hour Survey of Processors and Handlers of Agricultural Commodities

MULTIPLE UNIT FIRMS: Individual plant data are needed for this survey. ONLY activity directly connected with the addressed operation is to be included in this report. Please enter your headquarters address in Section F, page 7, if different from the above.

SECTION A. Product Information

1. **During 1967, was receiving and auctioning or receiving and storing of leaf tobacco the primary enterprise of this plant?**

If there were other enterprises connected with the tobacco warehousing facility, please see PAGE 8 for special instructions before answering this question.

YES ( ) Continue with Section B, page 2.

NO ( ) If NO, what was the primary enterprise of this plant?

_____ Since receiving, auctioning, or storing of leaf tobacco was not the primary enterprise of this plant during 1967, skip to Section F, page 7. *Do not answer Sections B through E.*

All facts you report will be kept CONFIDENTIAL and used only in combination with other reports for industry summaries. SEE SUPPLEMENTAL INSTRUCTIONS ON PAGE 8.

TOBACCO STEMMING AND REDRYING

Wage-Hour Survey of Processors and Handlers of Agricultural Commodities

MULTIPLE UNIT FIRMS: Individual plant data are needed for this survey. ONLY activity directly connected with the addressed operation is to be included in this report. Please enter your headquarters address in Section F, page 7, if different from the above.

SECTION A. Product Information

1. **During 1967, was stemming and redrying of leaf tobacco the primary enterprise of this plant?**

If there were other enterprises connected with the stemming and redrying facility, please see PAGE 8 for special instructions before answering this question.

YES ( ) Continue with Section B, page 2.

NO ( ) If NO, what was the primary enterprise of this plant?

_____ Since stemming and redrying of leaf tobacco was not the primary enterprise of this plant during 1967, skip to Section F, page 7. *Do not answer Sections B through E.*

All facts you report will be kept CONFIDENTIAL and used only in combination with other reports for industry summaries, SEE SUPPLEMENTAL INSTRUCTIONS ON PAGE 8.

MILK AND CREAM PROCESSING AND HANDLING

Wage-Hour Survey of Processors and Handlers of Agricultural Commodities

MULTIPLE UNIT FIRMS: Individual plant data are needed for this survey. ONLY activity directly connected with the addressed operation is to be included in this report. Please enter your headquarters address in Section F, page 7, if different from the above.

SECTION A. Product Information

1. During 1967, was processing or handling of raw milk and cream the primary enterprise of this plant? *See instructions on page 8.*

YES ( ) Skip to Question 2

NO ( ) If NO, what was the primary enterprise of this plant?

_____ Since processing or handling of raw milk and cream was not the primary enterprise of this plant during 1967, skip to Section F, Page 7. *Do not answer Questions 2 and 3 below or Sections B through E.*

0

2. During 1967, about what proportion of the value of production or sales of this plant was from:

a.	Processing of fluid milk?	11-13 %
b.	Manufacture of creamery butter, natural cheese, and condensed and evaporated milk?	14-16 %
c.	Manufacture of special dairy products? *For example, processed cheese and malted milk*	17-19 %
d.	Manufacture of ice cream and frozen desserts?	20-22 %
e.	Receiving station only?	23-25 %
f.	Other? ... *(Specify:* _____)	26-28 %
		100 %

3. Did the manufacture of ice cream and frozen desserts (d above) account for more than 50 percent of the value of production or sales of this plant?

0

YES ( ) Since manufacture of ice cream and frozen desserts was the primary enterprise of this plant during 1967, skip to Section F, page 7. *Do not answer Sections B through E.*

NO ( ) Continue with Section B, page 2.

All facts you report will be kept CONFIDENTIAL and used only in combination with other reports for industry summaries. *SEE SUPPLEMENTAL INSTRUCTIONS ON PAGE 8.*

SECTION B. Weekly Employment and Man-hours Worked

1

1. During 1967, how many weeks did this plant employ nonsupervisory* employees?... 11-12

*NONSUPERVISORY EMPLOYEES INCLUDE ALL WORKERS ENGAGED IN OFFICE AND NON-OFFICE FUNCTIONS, EXCEPT EXECUTIVE, ADMINISTRATIVE, PROFESSIONAL, AND OUTSIDE SALES PERSONNEL. WORKING FOREMEN ARE CLASSED AS NONSUPERVISORY EMPLOYEES. SEE Page 8 FOR ADDITIONAL EXPLANATIONS.

2. IN THE TABLE BELOW, RECORD THE FOLLOWING WEEKLY DATA FOR 1967.

a. In Column 1, list the month and day during 1967 on which each workweek ended. The first and last weeks in year need not be full workweeks. All other weeks should cover seven consecutive days.

b. In Column 2, record the total number of nonsupervisory employees who worked one hour or more during the week.

c. In Column 3, record the total number of man-hours worked by all employees included in Column 2.

Number of week	Month and day ended	Number of nonsupervisory employees working during week	Total number of hours worked during week by all employees in Column 2

(ALL VERSIONS EXCEPT COTTONSEED PROCESSING AND MILK AND CREAM PROCESSING AND HANDLING) 4 -

SECTION C - Length of Workweeks and Workdays

To complete this section it is necessary to select and rank the twenty workweeks during the year with the largest total number of hours worked by all nonsupervisory employees.

For your convenience in ranking the 20 weeks, a shaded area is provided to the right of column 3 in Section B. Please rank the weeks in descending order; the largest first, next largest and so on through the 20th largest. If two or more weeks contain the same number of hours worked, continue to rank each week beginning with the week that occurs the earliest in the year.

After the 20 weeks have been ranked, circle in the ranking column the weeks ranked number 1, number 7, number 10, number 14 and number 20. These are the five weeks for which additional data are needed.

TO COMPLETE THE TABLE BELOW, FOLLOW THESE STEPS:

a. Columns 1-4: Data for columns 1 through 4 should be copied from Section B on pages 2 and 3. The five weeks for which data are required in this section are the largest, 7th largest, 10th largest, 14th largest and 20th largest. Copy in column 2 the date each of the five weeks ended; in column 3 the number of nonsupervisory employees; and in column 4 the total number of hours worked during each week.

In the shaded line of the table below is an example of the correct entries for the largest week as copied from the Section B example. August 23 was entered in column 2, the 29 employees in column 3 and the 1280 total hours in column 4.

b. Columns 5, 11 and 17: These three columns request that the total number of nonsupervisory employees recorded in column 3 be broken down into (1) the number of employees who worked 40 hours or less during the week, (2) the number who worked over 40 hours up to and including 50 hours, and (3) the number who worked more than 50 hours during the week. The sum of columns 5, 11 and 17 should equal column 3.

In the example below, the total number of employees during the week was 29. Of these 29 employees, 17 worked 40 hours or less, 9 worked over 40 hours up to and including 50 hours, and 3 worked over 50 hours.

5 workweeks with the 1st, 7th, 10th, 14th and 20th largest total hours worked by nonsupervisory employees *(Copy from Section B, columns 2, 3 and 4.)*				Data for employees who worked 40 hours or less during the week						Data up to
Rank	Week ended	Total number employees	Total hours worked during week	How many employees worked 40 hours or less during the week?	How many total hours were worked by the employees in column 5?	How many of the hours in column 6 were paid at premium overtime rates?	How many of the employees in column 5 worked: 8 hours or less every day?	Over 8 hours at least one day but never over 10 hours?	Over 10 hours at least one day?	How many employees worked over 40 hours up to and including 50 hours during the week?
1	2	3	4	5	6	7	8	9	10	11
11-12		13-16	17-22	23-26	27-32	33-37	38-41	42-45	46-49	50-53

Cols. 5+11+17=col. 3 | Cols. 6+12+18=col. 4 | Cols. 8+9+10=col. 5

e. Columns 6, 12 and 18: In these columns record the total hours worked during the week by the employees recorded in columns 5, 11 and 17 respectively. The hours in columns 6, 12 and 18 should add to the total hours in column 4.

In the example below, the 670 hours entered in column 6 were worked by the 17 employees in column 5. The 445 hours entered in column 12 were worked by the nine employees in column 11. The 165 hours entered in column 18 were worked by the 3 employees in column 17. The sum of the 670 hours in column 6, the 445 hours in column 12, and the 165 hours in column 18 is equal to the 1280 hours recorded in column 4.

f. Columns 7, 13 and 19: In each of these columns report the number of hours for which premium overtime rates were paid for the hours worked in columns 6, 12 and 18 respectively.

Premium overtime hours are those beyond a specified number per day or per week that were paid at a rate not less than one and one-half times the regular hourly rate. Hours worked at premium holiday rates should be excluded in columns 7, 13 and 19, unless they represent hours worked beyond the regular work period.

In the example below, premium overtime was paid for 15 hours of the total 165 hours worked by the 3 employees who worked over 50 hours during the week. The 15 hours were recorded in column 19. No overtime was paid to the employees who worked 50 hours or less, therefore, a zero was recorded in columns 7 and 13.

g. Columns 8, 9 and 10: These columns request that the employees recorded in column 5 be separated into (1) the number who worked 8 hours or less every day, (2) the number who worked over 8 hours at least one day but never over 10 hours, and (3) the number who worked over 10 hours at least one day. The sum of columns 8, 9 and 10 should equal column 5.

In the example below, the entries in columns 8, 9 and 10 are 13, 4 and 0; the sum of these entries is 17, the same as the entry in column 5.

Columns 14, 15 and 16 and columns 20, 21 and 22 should be completed in the same manner as columns 8, 9 and 10.

for employees who worked over 40 hours and including 50 hours during the week					Data for employees who worked over 50 hours during the week					
How many total hours were worked by the employees in column 11?	How many of the hours in column 12 were paid at premium overtime rates?	How many of the employees in column 11 worked:			How many employees worked over 50 hours during the week?	How many total hours were worked by the employees in column 17?	How many of the hours in column 18 were paid at premium overtime rates?	How many of the employees in column 17 worked:		
		8 hours or less every day?	Over 8 hours at least one day but never over 10 hours?	Over 10 hours at least one day?				8 hours or less every day?	Over 8 hours at least one day but never over 10 hours?	Over 10 hours at least one day?

(Cols. 14+15+16=col. 11) (Cols. 20+21+22=col. 17)

SECTION C - Length of Workweeks and Workdays

To complete this section it is necessary to select and rank the twenty workweeks during the year with the largest total number of hours worked by all nonsupervisory employees.

For your convenience in ranking the 20 weeks, a shaded area is provided to the right of column 3 in Section B. Please rank the weeks in descending order; the largest first, next largest and so on through the 20th largest. If two or more weeks contain the same number of hours worked, continue to rank each week beginning with the week that occurs the earliest in the year.

After the 20 weeks have been ranked, circle in the ranking column the weeks ranked number 1, number 7, number 10, number 14 and number 20. These are the five weeks for which additional data are needed.

TO COMPLETE THE TABLE BELOW, FOLLOW THESE STEPS:

a. Columns 1-4: Data for columns 1 through 4 should be copied from Section B on pages 2 and 3. The five weeks for which data are required in this section are the largest, 7th largest, 10th largest, 14th largest and 20th largest. Copy in column 2 the date each of the five weeks ended; in column 3 the number of nonsupervisory employees; and in column 4 the total number of hours worked during each week.

In the shaded line of the table below is an example of the correct entries for the largest week as copied from the Section B example. August 23 was entered in column 2, the 29 employees in column 3 and the 1280 total hours in column 4.

b. Columns 5, 11 and 17: These three columns request that the total number of nonsupervisory employees recorded in column 3 be broken down into (1) the number of employees who worked 40 hours or less during the week, (2) the number who worked over 40 hours up to and including 48 hours, and (3) the number who worked more than 48 hours during the week. The sum of columns 5, 11 and 17 should equal column 3.

In the example below, the total number of employees during the week was 29. Of these 29 employees, 17 worked 40 hours or less, 9 worked over 40 hours up to and including 48 hours, and 3 worked over 48 hours.

5 workweeks with the 1st, 7th, 10th, 14th and 20th largest total hours worked by nonsupervisory employees (Copy from Section B, columns 2, 3 and 4.)				Data for employees who worked 40 hours or less during the week						Data up to
Rank	Week ended	Total number employees	Total hours worked during week	How many employees worked 40 hours or less during the week?	How many total hours were worked by the employees in column 5?	How many of the hours in column 6 were paid at premium overtime rates?	How many of the employees in column 5 worked: 8 hours or less every day?	Over 8 hours at least one day but never over 10 hours?	Over 10 hours at least one day?	How many employees worked over 40 hours up to and including 48 hours during the week?
1	2	3	4	5	6	7	8	9	10	11
11-12		13-16	17-22	23-26	27-32	33-37	38-41	42-45	46-49	50-53
EXAMPLE largest	AUG. 23	29	1280	17	678	0	13	4	0	9

7th Largest										
10th Largest										
14th Largest										
20th Largest										

Cols. 5+11+17=col. 3 | Cols. 6+12+18=col. 4 | Cols. 8+9+10=col. 5

c. Columns 6, 12 and 18: In these columns record the total hours worked during the week by the employees recorded in columns 5, 11 and 17 respectively. The hours in columns 6, 12 and 18 should add to the total hours in column 4.

In the example below, the 678 hours entered in column 6 were worked by the 17 employees in column 5. The 427 hours entered in column 12 were worked by the nine employees in column 11. The 175 hours entered in column 18 were worked by the 3 employees in column 17. The sum of the 678 hours in column 6, the 427 hours in column 12, and the 175 hours in column 18 is equal to the 1280 hours recorded in column 4.

d. Columns 7, 13 and 19: In each of these columns report the number of hours for which premium overtime rates were paid for the hours worked in columns 6, 12 and 18 respectively.

Premium overtime hours are those beyond a specified number per day or per week that were paid at a rate not less than one and one-half times the regular hourly rate. Hours worked at premium holiday rates should be excluded in columns 7, 13 and 19, unless they represent hours worked beyond the regular work period.

In the example below, premium overtime was paid for 31 hours of the total 175 hours worked by the 3 employees who worked over 48 hours during the week. The 31 hours were recorded in column 19. No overtime was paid to the employees who worked 48 hours or less, therefore, a zero was recorded in columns 7 and 13.

e. Columns 8, 9 and 10: These columns request that the employees recorded in column 5 be separated into (1) the number who worked 8 hours or less every day, (2) the number who worked over 8 hours at least one day but never over 10 hours, and (3) the number who worked over 10 hours at least one day. The sum of columns 8, 9 and 10 should equal column 5.

In the example below, the entries in columns 8, 9 and 10 are 13, 4 and 0; the sum of these entries is 17, the same as the entry in column 5.

Columns 14, 15, and 16 and columns 20, 21 and 22 should be completed in the same manner as columns 8, 9 and 10.

for employees who worked over 40 hours and including 48 hours during the week					Data for employees who worked over 48 hours during the week					
How many total hours were worked by the employees in column 11?	How many of the hours in column 12 were paid at premium overtime rates?	How many of the employees in column 11 worked:			How many employees worked over 48 hours during the week?	How many total hours were worked by the employees in column 17? Cols. 14+15+16=col. 11 | Cols. 20+21+22=col. 17

SECTION D. Shift Operations

1. During 1967, did this plant at any time operate with more than one shift of nonsupervisory workers?

   YES ( ) - Continue
   NO ( ) - Skip to Section E, below

See page 8 for instructions and explanations of multiple shift operations.

2. How many weeks during 1967 did this plant operate with more than one shift of nonsupervisory workers?..... 11-12

3. The data required in the table below is for the same five workweeks that were used in Section C on pages 4 and 5.

Workweek (Same as Section C)	Of the total nonsupervisory employees working during the week, what percent worked on the first shift?	Of the total hours worked by all nonsupervisory employees during the week, what percent were worked on the first shift?
1	2	3
1. Largest week	13-15 Percent	16-18 Percent
2. 7th largest week	19-21 Percent	22-24 Percent
3. 10th largest week	25-27 Percent	28-30 Percent
4. 14th largest week	31-33 Percent	34-36 Percent
5. 20th largest week	37-39 Percent	40-42 Percent

SECTION E. Collective Bargaining Agreements

1. Did this plant have one or more collective bargaining agreements or union contracts during 1967?

   YES ( ) - Continue
   NO ( ) - Skip to Question F-1 on Page 7

2. List below the names of the unions with which the plant has contracts and show an estimate of the number and type of workers covered during the workweek with the largest number of hours worked.

Name of Union	Number of employees covered by agreement during largest week	Major occupational groups covered (Check ones that apply)
11-13 Code 1.	14-17	(a) Plant workers.....( ) (b) Maintenance workers..( ) (c) Clerical workers.....( ) (d) Other (_____).....( ) 18-21
22-24 Code 2.	25-28	(a) Plant workers.....( ) (b) Maintenance workers..( ) (c) Clerical workers.....( ) (d) Other (_____).....( ) 29-32
33-35 Code 3.	36-39	(a) Plant workers.....( ) (b) Maintenance workers..( ) (c) Clerical workers.....( ) (d) Other (_____).....( ) 40-43
44-46 Code 4.	47-50	(a) Plant workers.....( ) (b) Maintenance workers..( ) (c) Clerical workers.....( ) (d) Other (_____).....( ) 51-54

3. Are premium payment provisions for overtime hours worked included in the collective bargaining agreements for any of your nonsupervisory employees?

55

YES - 1 ( ) Continue
NO - 0 ( ) If NO, skip to Section F

4. Does the premium overtime pay provision apply to a majority of your nonsupervisory employees?

56

YES - 1 ( )
NO - 0 ( )

5. Does your collective bargaining agreement require premium overtime rates for work over a certain number of hours per day?

YES - - ( ) If YES, after how many hours per day does the largest group of nonsupervisory employees begin to receive premium overtime rates?.....after ____ hours (57-58)

NO - - ( )

6. Does your collective bargaining agreement require premium overtime rates for work over a certain number of hours per week?

YES - - ( ) If YES, after how many hours per week does the largest group of nonsupervisory employees begin to receive premium overtime rates? .....after ____ hours (59-60)

NO - - ( )

7. Does the collective bargaining agreement permit waiving of the premium overtime pay provisions during any part of the year?

YES - - ( ) For how many weeks?..... ____ weeks (61-62)

NO - - ( )

4

SECTION F. Supplemental Information and Report Request

1. If this is a multiple unit firm and your headquarters address is different from the address on page 1, please enter your headquarters address.

NAME _____

ADDRESS _____

CITY _____ STATE _____ ZIP _____

2. Would you like to receive a copy of the report to be prepared from this survey?

YES ( ) If YES, send to: Address on page 1.....( )
Headquarters address above....( )
Address below.....( )

NO ( )

3. To whom should any necessary inquiry concerning this report be directed?

NAME _____ PHONE _____

ADDRESS _____

CITY _____ STATE _____ ZIP _____

4. Reported by _____ Title _____ Date _____

Please mail your report in the enclosed addressed envelope which requires no stamp. Thank you for your cooperation.

SUPPLEMENTAL INSTRUCTIONS AND EXPLANATIONS

The information requested in this questionnaire applies only to the one plant or establishment to which addressed, even though your firm may operate more than one plant.

SECTION A

This survey includes only those plants where the receiving and auctioning, or the receiving and storing of leaf tobacco is the primary enterprise.

If the addressed operation has other business enterprises, Item 1 should be answered YES if:

(a) the several enterprises are operated as one business with the same physical plant and labor force and the primary business is tobacco warehousing;

OR

(b) the several enterprises share the same physical plant but the tobacco warehousing operation is an independent business with a separate labor force;

OR

(c) the tobacco warehousing operation has a separate labor force and is located at a differeht site than the other enterprises.

If you consider tobacco warehousing to be a sideline or incidental part of the primary enterprise at the addressed operation, check NO in Item 1.

SECTION B

This questionnaire requests information for nonsupervisory employees only; all others are to be excluded. Nonsupervisory employees, as defined on page 2, include all workers engaged in office and non-office functions, except executive, administrative, professional and outside sales personnel. Employees having some supervisory duties such as working foremen, but who also perform many of the same operations as the workers they supervise, should be included as nonsupervisory employees. Laborers, drivers, operators, attendants, janitors, watchmen, repairmen, research aides, office, clerical and custodial workers, and similar occupational levels are examples of nonsupervisory employees.

The report should include all weeks in which one or more nonsupervisory employees worked during 1967. Include weeks during the "off season", even though only a few nonsupervisory office or maintenance personnel were employed.

SECTION D

To qualify as operating with more than one shift, each shift must be performing the same type of operations. Clean up crews and security personnel working after the regular shift should not be considered separate shifts but should be included with the regular shift employees.

Question 3 should be answered for the specified weeks only if more than one shift of nonsupervisory employees worked. For example, a plant operated with 2 shifts of nonsupervisory employees for only the 10 peak weeks and with one shift the remainder of the season. In this case, data should be entered for the largest, 7th largest and 10th largest weeks, but the 14th and 20th largest weeks should be left blank in Section D.

The shift operating during normal business hours is considered the first or regular shift.

Your best estimates will be satisfactory in Section D, if actual figures are not readily available.

* U.S. GOVERNMENT PRINTING OFFICE : 1968 O-760 (SRS-252)

SUPPLEMENTAL INSTRUCTIONS AND EXPLANATIONS

The information requested in this questionnaire applies only to the one plant or establishment to which addressed, even though your firm may operate more than one plant.

SECTION A

This survey includes only those plants where stemming and redrying of leaf tobacco is the primary enterprise.

If the addressed operation has other business enterprises, Item 1 should be answered YES if:

(a) the several enterprises are operated as one business with the same physical plant and labor force and the primary business is stemming and redrying of leaf tobacco;

OR

(b) the several enterprises share the same physical plant but the stemming and redrying operation is an independent business with a separate labor force;

OR

(c) the stemming and redrying operation has a separate labor force and is located at a different site than the other enterprises.

If you consider stemming and redrying of leaf tobacco to be a sideline or incidental part of the primary enterprise at the addressed operation, check NO in Item 1.

SECTION B

This questionnaire requests information for nonsupervisory employees only; all others are to be excluded. Nonsupervisory employees, as defined on page 2, include all workers engaged in office and non-office functions, except executive, administrative, professional and outside sales personnel. Employees having some supervisory duties such as working foremen, but who also perform many of the same operations as the workers they supervise, should be included as nonsupervisory employees. Laborers, drivers, operators, attendants, janitors, watchmen, repairmen, research aides, office clerical and custodial workers, and similar occupational levels are examples of nonsupervisory employees.

The report should include all weeks in which one or more nonsupervisory employees worked during 1967. Include weeks during the "off season", even though only a few nonsupervisory office or maintenance personnel were employed.

SECTION D

To qualify as operating with more than one shift, each shift must be performing the same type of operations. Clean up crews and security personnel working after the regular shift should not be considered separate shifts but should be included with the regular shift employees.

Question 3 should be answered for the specified weeks only if more than one shift of nonsupervisory employees worked. For example, a plant operated with 2 shifts of nonsupervisory employees for only the 10 peak weeks and with one shift the remainder of the season. In this case, data should be entered for the largest, 7th largest and 10th largest weeks, but the 14th and 20th largest weeks should be left blank in Section D.

The shift operating during normal business hours is considered the first or regular shift.

Your best estimates will be satisfactory in Section D, if actual figures are not readily available.

Question 3 should be answered for the specified weeks only if more than one shift of nonsupervisory employees worked. For example, a plant operated with 2 shifts of nonsupervisory employees for only the 10 peak weeks and with one shift the remainder of the season. In this case, data should be entered for the largest, 7th largest and 10th largest weeks, but the 14th and 20th largest weeks should be left blank in Section D.

The shift operating during normal business hours is considered the first or regular shift.

Your best estimates will be satisfactory in Section D, if actual figures are not readily available.

* U.S. GOVERNMENT PRINTING OFFICE : 1968 301-760 (BES-256)

SUPPLEMENTAL INSTRUCTIONS AND EXPLANATIONS

The information requested in this questionnaire applies only to the one plant or establishment to which addressed, even though your firm may operate more than one plant.

SECTION A

This survey includes only those plants where the processing of cottonseed is the primary enterprise.

If the addressed operation has other business enterprises, Item 1 should be answered YES if:

(a) the several enterprises are operated as one business with the same physical plant and labor force and the primary business is cottonseed processing;

OR

(b) the several enterprises share the same physical plant but the cottonseed processing operation is an independent business with a separate labor force;

OR

(c) the cottonseed processing operation has a separate labor force and is located at a different site than the other enterprises.

If you consider cottonseed processing to be a sideline or incidental part of the primary enterprise at the addressed operation, check NO in Item 1.

SECTION B

This questionnaire requests information for nonsupervisory employees only; all others are to be excluded. Nonsupervisory employees, as defined on page 2, include all workers engaged in office and non-office functions, except executive, administrative, professional and outside sales personnel. Employees having some supervisory duties such as working foremen, but who also perform many of the same operations as the workers they supervise, should be included as nonsupervisory employees. Laborers, drivers, operators, attendants, janitors, watchmen, draftsmen, repairmen, research aides, office, clerical and custodial workers, and similar occupational levels are examples of nonsupervisory employees.

The report should include all weeks in which one or more nonsupervisory employees worked during 1967. Include weeks during the "off season", even though only a few nonsupervisory office or maintenance personnel were employed.

SECTION D

To qualify as operating with more than one shift, each shift must be performing the same type of operations. Clean up crews and security personnel working after the regular shift should not be considered separate shifts but should be included with the regular shift employees.

Question 3 should be answered for the specified weeks only if more than one shift of nonsupervisory employees worked. For example, a plant operated with 2 shifts of nonsupervisory employees for only the 10 peak weeks and with one shift the remainder of the season. In this case, data should be entered for the largest, 7th largest and 10th largest weeks, but the 14th and 20th largest weeks should be left blank in Section D.

The shift operating during normal business hours is considered the first or regular shift.

Your best estimates will be satisfactory in Section D, if actual figures are not readily available.

* U.S. GOVERNMENT PRINTING OFFICE : 1968 301-760 (983-254)

SUPPLEMENTAL INSTRUCTIONS AND EXPLANATIONS

The information requested in this questionnaire applies only to the one plant or establishment to which addressed, even though your firm may operate more than one plant.

SECTION A

This survey includes only those plants where processing or handling of raw milk and cream is the primary enterprise.

Question 1 should be answered YES if you consider the major business of the plant involves the processing or handling of raw milk and cream. Answer NO, if you consider the handling or the processing of raw milk a sideline or incidental part of the main operation at the plant location.

If the answer to question 1 was YES, and this plant was involved in more than one of the operations listed in question 2, please estimate the percent of the value of production or sales that was utilized in each of the listed operations.

SECTION B

This questionnaire requests information for nonsupervisory employees only; all others are to be excluded. Nonsupervisory employees, as defined on page 2, include all workers engaged in office and non-office functions, except executive, administrative, professional and outside sales personnel. Employees having some supervisory duties such as working foremen, but who also perform many of the same operations as the workers they supervise, should be included as nonsupervisory employees. Laborers, drivers, operators, attendants, janitors, watchmen, draftsmen, repairmen, research aides, office, clerical and custodial workers, and similar occupational levels are examples of nonsupervisory employees.

The report should include all weeks in which one or more nonsupervisory employees worked during 1967. Include weeks during the "off season", even though only a few nonsupervisory office or maintenance personnel were employed.

SECTION D

To qualify as operating with more than one shift, each shift must be performing the same type of operations. Clean up crews and security personnel working after the regular shift should not be considered separate shifts but should be included with the regular shift employees.

Question 3 should be answered for the specified weeks only if more than one shift of nonsupervisory employees worked. For example, a plant operated with 2 shifts of nonsupervisory employees for only the 10 peak weeks and with one shift the remainder of the season. In this case, data should be entered for the largest, 7th largest and 10th largest weeks, but the 14th and 20th largest weeks should be left blank in Section D.

The shift operating during normal business hours is considered the first or regular shift.

Your best estimates will be satisfactory in Section D, if actual figures are not readily available.

STATISTICAL REPORTING SERVICE
WASHINGTON, D.C. 20250

July 1, 1968

Dear Sir:

We need your help in supplying information about the use of labor in your operation during 1967. The information supplied by you and many other processors and handlers of agricultural commodities will provide data needed by the U. S. Department of Labor and the Congress to evaluate the Federal Wage-Hour Law in relation to the existing labor situation.

All information you supply will be kept strictly confidential. It will be used only in summaries for your industry to be published by the Department of Labor in their report to the Congress. If you would like to receive a copy of this report, check yes in Section F of the enclosed questionnaire.

Please answer all questions that apply to your operation and mail your report promptly in the enclosed addressed envelope which requires no stamp.

Thank you for your cooperation.

Sincerely yours,

Harry C. Trelogan

INDUSTRIES SURVEYED FOR 1968

(ALL VERSIONS)

UNITED STATES DEPARTMENT OF AGRICULTURE
STATISTICAL REPORTING SERVICE
WASHINGTON, D.C. 20250

April 1, 1969

Dear Sir:

We need your help in supplying information about the use of labor in your operation during 1968. The information supplied by you and many other processors and handlers of agricultural commodities will provide data needed by the U. S. Department of Labor and the Congress to evaluate the Federal Wage-Hour Law in relation to the existing labor situation.

All information you supply will be kept confidential. We will summarize the data for your industry and will provide only the summary tables to the Department of Labor to be published in their report to the Congress. If you would like to receive a copy of this report, check *yes* in Section F of the enclosed questionnaire.

Please answer all questions that apply to your operation and mail your report promptly in the enclosed addressed envelope which requires no stamp.

Thank you for your cooperation.

Sincerely yours,

Harry L. Trelogan

FRESH FRUIT AND VEGETABLE PROCESSING

Wage-Hour Survey of Processors and Handlers of Agricultural Commodities

MULTIPLE UNIT FIRMS: Individual plant data are needed for this survey. ONLY activity directly connected with the addressed operation is to be included in this report. Please enter your headquarters address in Section F, page 7, if different from the above.

SECTION A. PRODUCT INFORMATION

1. During 1968, was processing of FRESH fruits and vegetables (excluding citrus) the primary activity of this plant? *See instructions on page 8.*

   YES ( ) Skip to Question 2

   NO ( ) If NO, what was the primary activity of this plant?

   EXPLAIN: _____

   _____ Since processing of FRESH fruits and vegetables (excluding citrus) was not the primary activity of this plant during 1968, skip to Section F, page 7. *Do not answer Question 2 below or Sections B through E.*

2. During 1968, about what proportion of the value of production or sales of this plant was from:

   a. Canning FRESH fruits and vegetables (excluding citrus)?..... ____%

      Primary commodity canned (e.g. peaches, sweet corn, etc.)_____

      Other commodities canned _____

   b. Freezing FRESH fruits and vegetables (excluding citrus)?..... ____%

      Primary commodity frozen _____

      Other commodities frozen _____

   c. Drying FRESH fruits and vegetables (excluding citrus)?..... ____%

      Primary commodity dried _____

      Other commodities dried _____

   d. All other processing?....(Specify) _____

      _____..... ____%

      100 %

All facts you report will be kept CONFIDENTIAL and used only in combination with other reports for industry summaries. SEE SUPPLEMENTAL INSTRUCTIONS ON PAGE 8.

1

OFFICE USE
11-12

SECTION B. WEEKLY EMPLOYMENT AND MAN-HOURS WORKED

1. During 1968, how many weeks did this plant process FRESH fruits and vegetables (excluding citrus)?..... 13-14

NONSUPERVISORY EMPLOYMENT DURING 1968

NONSUPERVISORY EMPLOYMENT includes all workers engaged in office and non-office functions, EXCEPT executive, administrative, professional, and outside sales personnel. Working foremen are classed as nonsupervisory employees. See page 8 for additional explanations.

2. During 1968, how many weeks did this plant employ one or more NONSUPERVISORY employees?..... 15-16

For each week during 1968 that one or more nonsupervisory employees worked at this plant, record the following information.

a. In column 1, record the month and day each workweek ended. Each workweek should cover seven consecutive days. However, the first and last weeks of the year should include only work performed during 1968 and may not cover seven days.

b. In column 2, record the total number of nonsupervisory employees who worked one hour or more during the week.

c. In column 3, record the total number of man-hours worked by all nonsupervisory employees included in column 2.

Number of week	Month and day ended	Number of nonsupervisory employees working during week	Total number of hours worked during week by all employees in Column 2

FRESH FRUIT AND VEGETABLE HANDLING

Wage-Hour Survey of Processors and Handlers of Agricultural Commodities

MULTIPLE UNIT FIRMS: Individual plant data are needed for this survey. ONLY activity directly connected with the addressed operation is to be included in this report. Please enter your headquarters address in Section F, page 7, if different from the above.

SECTION A. PRODUCT INFORMATION

1. Were FRESH fruits and vegetables, received direct from growers or growing area assemblers, handled by this establishment during 1968? *See instructions on page 8.*

   YES ( ) Skip to Question 2.

   NO ( ) If NO, briefly describe your operation below and skip to Section F, page 7. *Do not answer Question 2 below or Sections B through E.*

   TYPE OF OPERATION: _____

   _____

2. Is this establishment primarily a RETAIL operation?

   YES ( ) If YES, skip to Section F, page 7. *Do not answer Question 3 below or Sections B through E.*

   NO ( ) Continue with Question 3.

3. Considering the value of all commodities handled during 1968, what proportion was:

   a. FRESH fruits?..... _____%

   b. FRESH vegetables?..... _____%

   c. Other commodities?....(Specify _____) _____%

All facts you report will be kept CONFIDENTIAL and used only in combination with other reports for industry summaries. SEE SUPPLEMENTAL INSTRUCTIONS ON PAGE 8.

SECTION C. LENGTH OF WORKWEEKS AND WORKDAYS

To complete this section it is necessary to select and rank the twenty workweeks during the year with the largest total number of hours worked by all nonsupervisory employees.

For your convenience in ranking the 20 weeks, a shaded area is provided to the right of column 3 in Section B. Please rank the weeks in DESCENDING order; the largest first, next largest and so on through the 20th largest. If two or more weeks contain the same number of hours worked, continue to rank each week beginning with the week that occurs the earliest in the year.

After the 20 weeks have been ranked, circle in the ranking column the weeks ranked number 1, number 7, number 10, number 14, number 17 and number 20. These are the six weeks for which additional data are needed.

TO COMPLETE THE TABLE BELOW, FOLLOW THESE STEPS:

a. <u>Columns 1-4</u>: Data for columns 1 through 4 should be copied from Section B on pages 2 and 3. The six weeks for which data are required in this section are the largest, 7th largest, 10th largest, 14th largest, 17th largest and 20th largest. Copy in column 2 the date each of the six weeks ended; in column 3 the number of nonsupervisory employees; and in column 4 the total number of hours worked during each week.

In the shaded line of the table below is an example of the correct entries for the largest week as copied from the Section B example. August 23 was entered in column 2, the 29 employees in column 3 and the 1280 total hours in column 4.

b. <u>Columns 5, 11 and 17</u>: These three columns request that the total number of nonsupervisory employees recorded in column 3 be broken down into (1) the number of employees who worked 40 hours or less during the week, (2) the number who worked over 40 hours up to and including 50 hours, and (3) the number who worked more than 50 hours during the week. The sum of columns 5, 11 and 17 should equal column 3.

In the example below, the total number of employees during the week was 29. Of these 29 employees, 17 worked 40 hours or less, 9 worked over 40 hours up to and including 50 hours, and 3 worked over 50 hours.

Six workweeks with the 1st, 7th, 10th, 14th, 17th and 20th largest total hours worked by nonsupervisory employees (Copy from Section B, columns 1, 2 and 3)				Data for employees who worked 40 hours or less during the week						Data up to
							How many of the employees in column 5 worked:			
Rank	Week ended	Total number employees	Total hours worked during week	How many employees worked 40 hours or less during the week?	How many total hours were worked by the employees in column 5?	How many of the hours in column 6 were paid at premium overtime rates?	8 hours or less every day?	Over 8 hours at least one day but never over 10 hours?	Over 10 hours at least one day?	How many employees worked over 40 hours up to and including 50 hours during the week?
1	2	3	4	5	6	7	8	9	10	11

17th Largest										
20th Largest										

Code. [illegible] Code. [illegible] Code. [illegible]

c. Columns 6, 12 and 18: In these columns record the total hours worked during the week by the employees recorded in columns 5, 11 and 17 respectively. The hours in columns 6, 12 and 18 should add to the total hours in column 4.

In the example below, the 670 hours entered in column 6 were worked by the 17 employees in column 5. The 445 hours entered in column 12 were worked by the nine employees in column 11. The 165 hours entered in column 18 were worked by the 3 employees in column 17. The sum of the 670 hours in column 6, the 445 hours in column 12, and the 165 hours in column 18 is equal to the 1280 hours recorded in column 4.

d. Columns 7, 13 and 19: In each of these columns report the number of hours for which premium overtime rates were paid for the hours worked in columns 6, 12 and 18 respectively.

Premium OVERTIME hours are those beyond a specified number per day or per week that were paid at a rate not less than one and one-half times the regular hourly rate. Hours worked at premium HOLIDAY rates should be EXCLUDED in columns 7, 13, and 19, unless they represent hours worked beyond the regular work period.

In the example below, premium overtime was paid for 15 hours of the total 165 hours worked by the 3 employees who worked over 50 hours during the week. The 15 hours were recorded in column 19. No overtime was paid to the employees who worked 50 hours or less, therefore, a zero was recorded in columns 7 and 13.

e. Columns 8, 9 and 10: These columns request that the employees recorded in column 5 be separated into (1) the number who worked 8 hours or less every day, (2) the number who worked over 8 hours at least one day but never over 10 hours, and (3) the number who worked over 10 hours at least one day. The sum of columns 8, 9 and 10 should equal column 5.

In the example below, the entries in columns 8, 9 and 10 are 13, 4 and 0; the sum of these entries is 17, the same as the entry in column 5.

Columns 14, 15 and 16 and columns 20, 21 and 22 should be completed in the same manner as columns 8, 9 and 10.

for employees who worked over 40 hours and including 50 hours during the week					Data for employees who worked over 50 hours during the week					
How many total hours were worked by the employees in column 11?	How many of the hours in column 12 were paid at premium overtime rates?	How many of the employees in column 11 worked:			How many employees worked over 50 hours during the week?	How many total hours were worked by the employees in column 17?	How many of the hours in column 18 were paid at premium overtime rates?	How many of the employees in column 17 worked:		
		8 hours or less every day?	Over 8 hours at least one day but never over 10 hours?	Over 10 hours at least one day?				8 hours or less every day?	Over 8 hours at least one day but never over 10 hours?	Over 10 hours at least one day?

SECTION D. SHIFT OPERATIONS

1. **During 1968, did this plant at any time operate with more than one shift of nonsupervisory workers?**

   YES ( ) - Continue
   NO ( ) - Skip to Section E, below

See page 8 for instructions and explanations of multiple shift operations.

3

2. **How many weeks during 1968 did this plant operate with more than one shift of nonsupervisory workers?** 11-12

3. **The data required in the table below are for the same six workweeks that were used in Section C on pages 4 and 5.**

WORKWEEK (Same as Section C)	Of the total nonsupervisory employees working during the week, what percent worked on the first shift?	Of the total hours worked by all nonsupervisory employees during the week, what percent were worked on the first shift?
1	2	3
1. Largest week	13-15 Percent	16-18 Percent
2. 7th largest week	19-21 Percent	22-24 Percent
3. 10th largest week	25-27 Percent	28-30 Percent
4. 14th largest week	31-33 Percent	34-36 Percent
5. 17th largest week	37-39 Percent	40-42 Percent
6. 20th largest week	43-45 Percent	46-48 Percent

SECTION E. COLLECTIVE BARGAINING AGREEMENTS

3

1. **Did this plant have one or more collective bargaining agreements or union contracts during 1968?**

   YES ( ) - Continue
   NO ( ) - Skip to Question F-1 on page 7

2. **List below the names of the unions with which the plant has contracts and show an estimate of the number and types of workers covered during the workweek with the largest number of hours worked. See example below.**

4

Name of Union	Number of employees covered by agreement during largest week	Major occupational groups covered (Check ones that apply)
11-13 Code 14 — TEAMSTERS #333	14-17 — 21	(a) Plant workers.....(X) 18 (b) Maintenance workers..(X) 19 (c) Clerical workers.....( ) 20 (d) Other ( ).....( ) 21
11-13 Code — 1st	14-17	(a) Plant workers.....( ) 18 (b) Maintenance workers..( ) 19 (c) Clerical workers.....( ) 20 (d) Other ( ).....( ) 21
23-24 Code — 2nd	25-28	(a) Plant workers.....( ) 29 (b) Maintenance workers..( ) 30 (c) Clerical workers.....( ) 31 (d) Other ( ).....( ) 32
33-35 Code — 3rd	36-39	(a) Plant workers.....( ) 40 (b) Maintenance workers..( ) 41 (c) Clerical workers.....( ) 42 (d) Other ( ).....( ) 43

3. **Are premium payment provisions for overtime hours worked included in the collective bargaining agreements for any of your nonsupervisory employees?**

YES - 1 ( ) Continue
NO - 0 ( ) If NO, skip to Section F, below

4. **Does the premium overtime pay provision apply to a majority of your nonsupervisory employees?**

OFFICE USE

YES - 1 ( )
NO - 0 ( )

5. **Does your collective bargaining agreement require premium overtime rates for work over a certain number of hours per day?**

*YES - - ( ) If YES, after how many hours per day does the largest group of nonsupervisory employees begin to receive premium overtime rates?.....*after _____ hours
57-58

NO - - ( )

6. **Does your collective bargaining agreement require premium overtime rates for work over a certain number of hours per week?**

*YES - - ( ) If YES, after how many hours per week does the largest group of nonsupervisory employees begin to receive premium overtime rates?.....*after _____ hours
59-60

NO - - ( )

7. **Does the collective bargaining agreement permit waiving of the premium overtime pay provisions during any part of the year?**

YES - - ( ) For how many weeks?..... _____ weeks
61-62
NO - - ( )

SECTION F. SUPPLEMENTAL INFORMATION AND REPORT REQUEST

1. **If this is a multiple unit firm and your headquarters address is different from the address on page 1, please enter your headquarters address.**

NAME _____

ADDRESS _____

CITY _____ STATE _____ ZIP _____

2. **Would you like to receive a copy of the report to be prepared from this survey?**

YES ( ) If YES, send to: Address on page 1.....( )
Headquarters address above....( )
Address below.....( )

NO ( )

3. **To whom should any necessary inquiry concerning this report be directed?**

NAME _____ PHONE _____

ADDRESS _____

CITY _____ STATE _____ ZIP _____

4. **Reported by** _____ **Title** _____ **Date** _____

Please mail your report in the enclosed addressed envelope which requires no stamp. Thank you for your cooperation.

SUPPLEMENTAL INSTRUCTIONS AND EXPLANATIONS

The information requested in this questionnaire applies only to the one plant or establishment to which addressed, even though your firm may operate more than one plant.

SECTION A

The detailed information in Sections B through E is only to be reported for plants whose primary activity during 1968 was processing of FRESH fruits and vegetables (excluding citrus). All operations necessary or incidental to the processing of fruits and vegetables in their raw or natural state are to be included in determining whether the processing of FRESH fruits and vegetables was the primary activity. EXCLUDE operations connected with processing of products other than fruits and vegetables; or the processing of fruits and vegetables that have been frozen (longer than 24 hours), preserved, canned, dehydrated or otherwise changed so that they are no longer in their raw or natural state.

Considering all activity at the addressed plant, answer Question 1 yes, if processing of FRESH fruits and vegetables was the primary activity. If processing of FRESH fruits and vegetables was not the primary activity during 1968, complete Question 1 and Section F only, and mail your report in the addressed envelope enclosed.

SECTION B

In Question 1, record the number of weeks that fruits and vegetables in their raw or natural state were processed at this plant.

In Question 2, include all weeks during which one or more nonsupervisory employees worked, regardless of products being processed. Be sure to include weeks during the "off season" even though only a few nonsupervisory office or maintenance personnel were employed. Nonsupervisory employment includes all workers engaged in office and non-office functions, EXCEPT executive, administrative, professional and outside sales personnel. Employees having some supervisory duties such as working foremen, but who also perform many of the same operations as the workers they supervise, should be included as nonsupervisory employees. Laborers, drivers, operators, attendants, janitors, watchmen, draftsmen, repairmen, research aides, office, clerical and custodial workers, and similar occupational levels are examples of nonsupervisory employees.

Only nonsupervisory employment is to be reported in this questionnaire.

SECTION D

To qualify as operating with more than one shift, each shift must be performing the same type of operations. Clean up crews and security personnel working after the regular shift should not be considered separate shifts but should be included with the regular shift employees.

Question 3 should be answered for the specified weeks only if more than one shift of nonsupervisory employees worked. If actual figures are not readily available, your best estimates will be satisfactory. For example, a plant operated with 2 shifts of nonsupervisory employees for only the 10 peak weeks and with one shift the remainder of the season. In this case, data should be entered for the largest, 7th largest and 10th largest week, but the 14th, 17th and 20th largest week should be left blank in Section B.

The shift operating during normal business hours is considered the first or regular shift.

SUPPLEMENTAL INSTRUCTIONS AND EXPLANATIONS

The information requested in this questionnaire applies only to the one plant or establishment to which addressed, even though your firm may operate more than one plant.

SECTION A

The detailed information in Sections B through E is only to be reported for plants whose primary activity during 1968 was processing of FRESH citrus fruits. All operations necessary or incidental to the processing of citrus fruits in their raw or natural state are to be included in determining whether FRESH citrus processing was the primary activity. EXCLUDE operations connected with processing of products other than citrus fruits; or the processing of citrus fruits that have been frozen (longer than 24 hours), preserved, canned, dehydrated or otherwise changed so that they are no longer in their raw or natural state.

Considering all activity at the addressed plant, answer Question 1 yes, if processing of FRESH citrus fruits was the primary activity. If processing of FRESH citrus fruits was not the primary activity during 1968, complete Question 1 and Section F only, and mail your report in the addressed envelope enclosed.

SECTION B

In Question 1, record the number of weeks that citrus fruits in their raw or natural state were processed at this plant.

In Question 2, include all weeks during which one or more nonsupervisory employees worked, regardless of products being processed. Be sure to include weeks during the "off season" even though only a few nonsupervisory office or maintenance personnel were employed. Nonsupervisory employment includes all workers engaged in office and non-office functions, EXCEPT executive, administrative, professional and outside sales personnel. Employees having some supervisory duties such as working foremen, but who also perform many of the same operations as the workers they supervise, should be included as nonsupervisory employees. Laborers, drivers, operators, attendants, janitors, watchmen, draftsmen, repairmen, research aides, office, clerical and custodial workers, and similar occupational levels are examples of nonsupervisory employees.

Only nonsupervisory employment is to be reported in this questionnaire.

SECTION D

To qualify as operating with more than one shift, each shift must be performing the same type of operations. Clean up crews and security personnel working after the regular shift should not be considered separate shifts but should be included with the regular shift employees.

Question 3 should be answered for the specified weeks only if more than one shift of nonsupervisory employees worked. If actual figures are not readily available, your best estimates will be satisfactory. For example, a plant operated with 2 shifts of nonsupervisory employees for only the 10 peak weeks and with one shift the remainder of the season. In this case, data should be entered for the largest, 7th largest and 10th largest week, but the 14th, 17th and 20th largest week should be left blank in Section D.

The shift operating during normal business hours is considered the first or regular shift.

SUPPLEMENTAL INSTRUCTIONS AND EXPLANATIONS

The information requested in this questionnaire applies only to the one plant or establishment to which addressed, even though your firm may operate more than one plant.

SECTION A

The detailed information in Sections B through E is only to be reported by establishments (other than retail establishments) that handled FRESH fruits and vegetables received direct from growers or growing area assemblers and were not primarily engaged in the processing of FRESH fruits and vegetables. 'Handling' of FRESH fruits and vegetables includes operations such as assembling from growers, loading, transporting, unloading, weighing, counting, cleaning, washing, waxing, polishing, grading, sizing, sorting, coloring, cooling, wrapping, packing in baskets, crates, bags or other containers and storing.

In Question 1, check NO and describe your operation, (1) if your establishment did not handle any FRESH fruits and vegetables received direct from growers or growing area assemblers, (2) if your establishment received FRESH fruits and vegetables direct from growers or growing area assemblers but was primarily engaged in the processing of FRESH fruits and vegetables, or (3) if your establishment was primarily a city wholesaler or jobber engaged in distributing to retailers.

Establishments that handle FRESH fruits and vegetables received direct from growers or growing area assemblers but are primarily a RETAIL operation are to be excluded from this survey. If your establishment was primarily a retail operation during 1968, check yes in Question 2, complete Section F, and mail your report in the addressed envelope enclosed.

SECTION B

In Question 1, record the number of weeks that your establishment handled FRESH fruits and vegetables which you received direct from growers or growing area assemblers. EXCLUDE weeks in which your establishment operated but did not handle any FRESH fruits and vegetables received direct from growers or growing area assemblers.

In Question 2, include all weeks during which one or more nonsupervisory employees worked, regardless of operations performed or source of commodity handled. Be sure to include weeks during the 'off season' even though only a few nonsupervisory office or maintenance personnel were employed. Nonsupervisory employment includes all workers engaged in office and non-office functions, EXCEPT executive, administrative, professional and outside sales personnel. Employees having some supervisory duties such as working foremen, but who also perform many of the same operations as the workers they supervise, should be included as nonsupervisory employees. Laborers, drivers, operators, attendants, janitors, watchmen, draftsmen, repairmen, research aides, office, clerical and custodial workers, and similar occupational levels are examples of nonsupervisory employees.

Only nonsupervisory employment is to be reported in this questionnaire.

SECTION D

To qualify as operating with more than one shift, each shift must be performing the same type of operations. Clean up crews and security personnel working after the regular shift should not be considered separate shifts but should be included with the regular shift employees.

Question 3 should be answered for the specified weeks only if more than one shift of nonsupervisory employees worked. If actual figures are not readily available, your best estimates will be satisfactory. For example, a plant operated with 2 shifts of nonsupervisory employees for only the 10 peak weeks and with one shift the remainder of the season. In this case, data should be entered for the largest, 7th largest and 10th largest week, but the 14th, 17th and 20th largest week should be left blank in Section D.

The shift operating during normal business hours is considered the first or regular shift.

SUPPLEMENTAL INSTRUCTIONS AND EXPLANATIONS

The information requested in this questionnaire applies only to the one plant or establishment to which addressed, even though your firm may operate more than one plant.

SECTION A

The detailed information in Sections B through E is only to be reported for plants whose primary activity during 1968 was sugar cane processing. All operations necessary or incidental to the producing of raw sugar, sirup or finished cane sugar from sugar cane received at your plant are to be included in determining whether the primary activity was sugar cane processing. EXCLUDE all operations connected with the refining of raw cane sugar or sugar sirups received from other plants.

Considering all activity at the addressed plant, answer Question 1 yes, if sugar cane processing was the primary activity. If sugar cane processing was not the primary activity during 1968, complete Question 1 and Section F only, and mail your report in the addressed envelope enclosed.

SECTION B

In Question 1, record the number of weeks that this plant processed sugar cane.

In Question 2, include all weeks during which one or more nonsupervisory employees worked, regardless of products being processed. Be sure to include weeks during the "off season" even though only a few nonsupervisory office or maintenance personnel were employed. Nonsupervisory employment includes all workers engaged in office and non-office functions, EXCEPT executive, administrative, professional and outside sales personnel. Employees having some supervisory duties such as working foremen, but who also perform many of the same operations as the workers they supervise, should be included as nonsupervisory employees. Laborers, drivers, operators, attendants, janitors, watchmen, draftsmen, repairmen, research aides, office, clerical and custodial workers, and similar occupational levels are examples of nonsupervisory employees.

Only nonsupervisory employment is to be reported in this questionnaire.

SECTION D

To qualify as operating with more than one shift, each shift must be performing the same type of operations. Clean up crews and security personnel working after the regular shift should not be considered separate shifts but should be included with the regular shift employees.

Question 3 should be answered for the specified weeks only if more than one shift of nonsupervisory employees worked. If actual figures are not readily available, your best estimates will be satisfactory. For example, a plant operated with 2 shifts of nonsupervisory employees for only the 10 peak weeks and with one shift the remainder of the season. In this case, data should be entered for the largest, 7th largest and 10th largest week, but the 14th, 17th and 20th largest week should be left blank in Section D.

The shift operating during normal business hours is considered the first or regular shift.

APPENDIX II

Definition of Selected Agricultural Handling and Processing Industries Under Seasonal Industry Determinations Issued Pursuant to Sections 7(c) and 7(d) of the Fair Labor Standards Act

APPENDIX II-CONTENTS

	Page
Explanatory Note	B-1
Selected Industries of a Seasonal Nature Within the Meaning of Section 7(c):	
Beet Sugar	B-1
Cotton Ginning	B-1
Cotton Storing and Compressing	B-2
Grain Storage	B-2
Tobacco	B-2
Selected Industries Characterized by Annually Recurring Seasonal Peaks of Operations Within the Meaning of Section 7(d):	
Cottonseed Processing	B-3
Dairy Products	B-3
Selected Seasonal Industries Engaged in Certain Operations on Perishable Agricultural or Horticultural Commodities Within the Meaning of Both Section 7(c) and Section 7(d):	
Fresh Fruit and Vegetable	B-5
Sugar Cane Processing and Milling	B-5

Explanatory Note

The definitions listed below are excerpts from industry determinations issued by the Secretary of Labor pursuant to sections 7(c) and 7(d) of the Fair Labor Standards Act. This listing is confined to the definitions applicable to industries studied in this report.

Selected Industries of a Seasonal Nature Within the Meaning of Section 7(c)

Beet Sugar

As used in this determination, the term "beet sugar industry" includes: receiving the sugar beets at the factory site or at receiving stations operated by the beet sugar factory; the transporting of the beets from such receiving stations to the factory when performed by employees of the sugar beet processor; the production of sugar from the beets and the further extraction of sugar from sugar beet molasses by mixing and concurrently processing the molasses with the beet juice obtained directly from the sugar beets; and the following operations when performed by employees of the sugar beet processor on or near the premises of the beet sugar plant while the sugar beets are being received at the factory or are being processed into sugar: the powdering of sugar; the compressing and artificial drying of wet beet pulp; the weighing, handling, packaging, bagging and storing of sugar, wet beet pulp, dried beet pulp and molasses; the removal of these products from the premises and placing them in transportation facilities; and any operations or services necessary or incident to the foregoing, such as the testing of the equipment, maintenance, repairs, clerical work or sales work. The term "beet sugar industry" does not include the quarrying of lime, the manufacture of bags or other sugar containers, or the manufacture of yeast, citric acid, or any other by-products not specifically included in this definition.

Cotton Ginning

For purposes of this determination, the term "industry engaged in cotton ginning" includes the following operations, when performed during the period or periods when cotton is being received for ginning: the receiving of seed cotton at the gin, the handling, cleaning, ginning and baling of cotton, the handling of the baled cotton and cottonseed, and any operations or services

necessary or incident to the foregoing, including the placing of cotton and cottonseed in storage or transportation facilities on or near the premises.

Cotton Storing and Compressing

For the purpose of this finding, the cotton storing industry is defined to include the receiving, handling, and storing of raw cotton and the compressing of raw cotton when performed at a cotton warehouse or compress-warehouse facility other than one operated in conjunction with a cotton mill. Also included are any operations incident to the foregoing such as loading, unloading, weighing, sampling, assembling, and preparing for shipment when performed at the storing establishment.

Grain: Flaxseed, Buckwheat, Soybeans, Rough Rice: Storing and Drying Before Storage in Country Grain Elevators, Public Terminal and Subterminal Grain Elevators, Wheat Flour Mill Elevators, Non-Elevator Type Bulk Storage Establishments, and Flat Warehouses

For purposes of this determination, the industry engaged in the storing, and drying before storage, of grain includes the operations of storing and drying prior to storage of grain, flaxseed, buckwheat, soy beans, and rough rice, and any operations necessary or incident to such storing and drying, including: receiving, unloading, weighing, testing, cleaning, mixing, fumigating, shelling corn, sacking, and removing these commodities from storage, during the period or periods when the commodities are being received, dried or stored.

The term "non-elevator type bulk grain storing establishments" includes warehouses, quonset huts, barns, steel tanks, tents, and other similar storage facilities which are used to store grain, whether operated in conjunction with an elevator to supplement the elevator's storage space or operated as independent establishments. "Flat warehousing" means the storing of grain in sacks.

The exemption does not extend to cash grain commission merchants.

Tobacco

Several seasonal industry determinations have been issued for the tobacco industry. Separate determinations apply to the following:

1. That branch of the tobacco industry engaged in the buying, handling, stemming, and redrying of green leaf tobacco of types 11, 12, 13, 14, 21, 22, 23, 24, 31,

35, 36, and 37 (as defined by the United States Department of Agriculture) and the packing and storing thereof.

2. That branch of the tobacco industry engaged in the buying, handling, stripping, sorting, grading, sizing, packing, and in the stemming prior to packing, of perishable cigar leaf tobacco of types 41-45, 51-55, 61 and 62 (as defined by the United States Department of Agriculture).

3. That branch of the tobacco industry engaged in the buying, handling, sorting and grading of green leaf tobacco type 32 (as defined by the United States Department of Agriculture) and the packing and storing thereof.

4. The auction and loose leaf tobacco industry insofar as said industry uses leaf tobacco of types 11, 12, 13, 14, 21, 22, 23, 24, 31, 35, 36, and 37 (as defined by the United States Department of Agriculture) and consists of the services necessary and incidental to the sale at auction of green leaf tobacco of the aforementioned types including in some instances, stripping the tobacco from the stalk and the grading thereof.

Selected Industries Characterized by Annually Recurring Seasonal Peaks of Operation Within the Meaning of Section 7(d)

Cottonseed Processing

For the purpose of this finding, the cottonseed processing industry is defined to consist of the following operations only: The receiving, handling, and storing of cottonseed; the processing of cottonseed during the period when the seed is being received, and any operations necessary and incident to the foregoing during this period.

Dairy Products

For purpose of this finding, the dairy products industry is defined to include all, but only, the following operations:

(a) Transportation of milk and cream from farms.

(b) Handling and preparing milk or cream at receiving stations, fluid milk plants and processing plants, and transporting the milk or cream from one to the other.

(c) First processing of milk, buttermilk, whey, skimmed milk or cream into dairy products, including: Pasteurized, flavored, condensed, evaporated, concentrated, or dried, whole or skimmed milk; sweet, sour, or dried cream; whey, renovated, process or creamery butter; any variety of cheese including natural or processed; condensed, evaporated, or dried buttermilk; wet or dried casein; malted milk powder; crude milk sugar; ice cream, ice milk, and sherbet (except water ices).

(d) Any operations or services necessary or incident to the foregoing performed by employees employed by an employer in an enterprise which is in the industry, including necessary packaging, storage, and shipping at the plant of the dairy products made by the enterprise, plant maintenance, machinery repair, clerical work necessary or incident to the operations described in paragraphs (a) through (c), handling the nondairy ingredients used in the dairy products, aging, cleaning, paraffining, weighing, slicing, and wrapping cheese made by the enterprise, assembling knock-down boxes, and transferring ingredients and supplies from stock to meet the daily needs of processing operations.

(e) Any other operations normally performed in the Dairy Products Industry which do not occupy more than 20 percent of the time worked in any workweek by an employee for whom the exemption is claimed.

Not included in the industry are operations which do not constitute or are not necessary or incident to the operations of an enterprise engaged in activities described in paragraphs (a) through (c) above, and which exceed the amount provided in (e) above, such as storing, slicing, and packaging cheese and printing, wrapping, and storing butter bought in bulk from cheesemakers and buttermakers, further processing of dry casein, regrinding, rescreening, and repacking dried whey, handling and distributing nondairy products, and assembling and distributing dairy products as a wholesaler or other distributor.

Selected Seasonal Industries Engaged in Certain Operations on Perishable Agricultural or Horticultural Commodities Within the Meaning of Both Section 7(c) and Section 7(d)

Fresh Fruit and Vegetable

For purpose of this finding, the fresh fruit and vegetable industry is defined to include only the handling, packing, storing, preparing, first processing, and canning, of any fresh fruits and vegetables in their raw or natural state and any other operations and services necessary and incidental thereto. It includes such operations when performed in connection with fresh fruits and vegetables which have been merely refrigerated, but does not include operations performed in connection with fresh fruits and vegetables which have been frozen, preserved, canned, dehydrated, or otherwise changed so that they are no longer perishable or in their raw or natural state.

The industry to which these findings apply may include transactions whereby, for purpose of filling a customer's order, fresh fruits and vegetables that have been packed or canned by employees of one employer are commingled with those packed or canned by the employees of the employer claiming these exemptions: Provided, That the amount of fill-in goods is 5 percent or less of the weekly volume of shipments made during each week in which the exemption is claimed.

Sugar Cane Processing and Milling

Industry determinations for the sugar cane processing industry have been issued for two States--Florida and Louisiana--and Puerto Rico. The sugar cane processing industry in Louisiana qualifies for exemption under section 7(c) only. In Florida and Puerto Rico, both Section 7(c) and Section 7(d) are applicable.

Puerto Rico - The Puerto Rican sugar cane processing and milling industry is defined to consist of the following operations in the Commonwealth of Puerto Rico: The transportation of sugarcane to a sugarcane processing mill when performed by employees of the processor; the unloading of sugarcane at the mill; the processing of sugarcane into raw sugar, syrup, and molasses; and the following operations when performed on the premises of a sugarcane mill while the sugarcane is being processed: The immediate refining, as one of a connected series of operations, of raw sugar produced from sugarcane ground on the premises; the refining, by the introduction into such series of operations, of raw sugar which has been produced during the same grinding season in other Puerto Rican cane processing plants of the employer,

except in establishments where the refined sugar made from such transferred raw sugar constitutes one-half or more of the refined sugar produced during the cane processing season, or where purchased raw sugar or raw sugar produced outside of Puerto Rico is refined during the cane season; the burning, removing from the premises, or dehydrating of bagasse resulting from the processing of sugarcane; the handling, baling, bagging, packing, and storing of the sugar, syrup, molasses, or bagasse; and any operations necessary and incident to the foregoing, including the placing of these products in storage or transportation facilities on or near the premises.

Florida - The Florida sugar cane processing and milling industry is defined to include the following operations: The loading of sugar cane in the fields and its transportation to a sugar cane processing mill when performed by employees of the processor; the unloading of sugar cane at the mill; the processing of sugar cane into raw sugar, syrup and molasses; and the following operations when performed on the premises of a sugar cane mill while the sugar cane is being processed; the immediate refining, as one of a connected series of operations, of raw sugar produced from sugar cane ground on the premises; the refining, by the introduction into such series of operations, of raw sugar which has been produced during the same grinding season in other Florida cane processing plants of the employer, except in establishments where the refined sugar made from such transferred raw sugar constitutes one-half or more of the refined sugar produced during the cane processing season, or where purchased raw sugar, or raw sugar produced outside of Florida is refined during the cane processing season; the burning, removing from the premises or dehydrating of bagasse resulting from the processing of sugar cane; the handling, baling, bagging, packing, and storing of the sugar, syrup, molasses, or bagasse; and any operations necessary and incident to the foregoing including the placing of these products in storage or transportation facilities on or near the premises.

Louisiana - The Louisiana sugar cane processing and milling industry is defined to include the following operations: The unloading of sugar cane at the mill; the processing of sugar cane into sugar, syrup and molasses; and the following operations when performed on the premises of a sugar cane processing mill while the sugar cane is being processed: The immediate refining, as one of a connected series of operations, of raw sugar produced from sugar cane ground on the premises; the refining, by the introduction into such series of operations, of raw sugar which

has been produced during the same grinding season in other Louisiana cane processing plants of the employer, except in establishments where the refined sugar made from such transferred raw sugar constitutes half or more of the refined sugar produced during the cane processing season, or where purchased raw sugar, or raw sugar produced outside of Louisiana is refined during the cane processing season; the burning, removing from the premises, or dehydrating of bagasse resulting from the processing of sugar cane; the handling, baling, bagging, packing and storing of the sugar, syrup, molasses or bagasse; the extraction and processing of calcium aconitate from "B" molasses; and any operations necessary and incident to the foregoing, including the placing of these products in storage or transportation facilities on or near the premises.

GPO 887-047
